

DAG TEMPERATURE SWITCH

At the heart of a **DAG** temperature switch is a **German** make **Jumo** vapour/liquid filled thermostat, one of the best in the world.

The sensor is an **SS-316** rigid stem (max. 1m. long). Alternatively flexible capillary for remote mounting can be provided (max. 1.8m).

The stem can be inserted in a thermowell and tightened at the required height by using movable (adjustable) connector. In case of flexible capillary the bulb can be inserted in the thermowell (**Bulb Ø 6.5 - 7 mm**).

Alternatively a welded flange on the stem can be directly mounted on to the vessel. However the stem length is fixed.

Model decoding:-

WP/ : Weatherproof enclosure

FLP/ : Flameproof enclosure

TS : Temperature switch

□□□ : Maximum Range

Example : FLP/TS-120

(Flameproof Temperature Switch, Std. range 0-120°C)

Specifications

Enclosure : Cast Aluminium, Epoxy Powder Coated
: Weatherproof to IS:13947; IP66
: Flameproof to IS:2148, Zone 1&2, Gas Group IIA & IIB / IIC, T6

Sensing Type: Vapour / Liquid filled capillary
Sensor : SS-316 Rigid Stem, Ø10 x 1000mm max.
: Flexible capillary, 1000mm max.

Ranges : 0-120°C, 0-150°C, 50-300°C
Over-Range : 180°C (350°C for 50-300°C range) Sensor end only
Adjustment : Internal knob with Indicating scale

Differential : < 8% FSR

Accuracy : ± 2%

Repeatability : ± 1%

Switch Conn. : 1/2" / 3/4"NPTM, 1/2"BSPM adjustable connector, Flanged, etc.

Output : SPDT potential free contact, 15A 250VAC / 5A 24VDC

STANDARD DAG THERMOWELLS

FLANGED TAPER

FLANGED STRAIGHT

FLANGED SEMI-TAPER

SCREWED STRAIGHT

Temp. switch connection	: 1/2" NPTF, 1/2" BSPF
Process connection	: Flanged, Screwed (as per customer data)
Material of construction	: CS, SS304, SS316/L, (Others on request)
Type	: Drilled bar stock, Pipe fabricated
